

COLORPRINT EXTRA
Digital printing material for difficult fabrics

Description	Material for thermoresin, ink jet solvent and eco solvent based inks - printing and cutting systems. Suitable for "difficult" fabrics such as nylon jackets, sportswear, bags, umbrellas and leather.
Tips	Polyester backing. If applied onto silicon treated fabrics, we highly recommend application and washing test. We suggest to let the print dry (at least 12 hours) before rolling, overlaying or heat transferring the material.
Application instructions	<ol style="list-style-type: none"> 1) Print and cut the material 2) Let the print dry at least 12 hours. 3) Weed and remove image from backing with an hot resistant application tape. We recommend to use the Siser transparent polyester TTD 4) Heat apply following the below indicated conditions 5) Remove application tape once cold <p>Due to the many different base materials available on the market, the following heat transfer instructions are given as guideline only:</p>
Temperature:	165°C
Time:	12 – 14 sec.
Pressure:	minimum
Washable to:	30°C Max.
