

EVOLUTION PU

Description

Heat seal material, specifically formulated for ink jet solvent and eco solvent based inks – printing and cutting systems. Evolution PU is a high opacity, thin digital media with an elevated covering power and very soft to the hand.

Paper backing.

Basic Information

Due to the many different base materials available on the market, the following heat transfer instructions are given as guideline only:

Temperature: 160°C

Time: 15”

Pressure: high

Application Instructions

- 1) Print the material
- 2) Cut the material **1 hour after printing**. Cutting must be performed at **high speed** and with a **very little blade depth**
- 3) Do not weed the material around the image
- 4) Remove the printed image from the backing using the **Siser transparent polyester T.T.D.** (adhesive, transparent polyester, resistant to high temperatures) or other application tapes
- 5) Weed the exceeding material
- 6) Heat apply
- 7) Remove application tape **hot**. Should you use other application tapes, follow the manufacturer's instructions
- 8) We recommend you to wait a few hours **before stretching** the garment

Suitable for

Cotton, polyester, poly-cotton blends

Not suitable for treated and dyed garments (sublimation inks)

Washing: (wait 24h after the heat transfer)

40°C Max. – wash inside out - do not use bleach or other aggressive chemical agents

Dry-cleaning : no

Tumble drier : not advisable

N.B. : all information given in this sheet are based on our experience

We recommend to always perform a test before starting standard production

The product meets the Italian and Ue regulations relating to its proper use.

This document can be subject to variations. Updated versions are available on our website www.siser.it.
