

GLITTER PRINT
Digital printing material

Description	Glitter material specifically formulated for thermoresin, ink jet solvent and eco solvent based inks – printing and cutting systems. Suitable for normal textiles (without silicon treatment), it is very opaque even on dark fabrics.
Tips	We suggest to let the print dry (at least 12 hours) before rolling, overlaying or heat transferring the material.
Application instructions	<ol style="list-style-type: none"> 1) Print and cut the material 2) Let the print dry at least 12 hours 3) Remove image from backing 4) Cover with a protective silicon treated paper or Teflon®. 5) Heat apply 6) Remove protective paper once cold <p>Due to the many different base materials available on the market, the following heat transfer instructions are given as guideline only:</p>
Temperature:	160°C
Time:	15 sec.
Pressure:	medium/low
Washable to:	50°C Max.
