

COLORPRINT CRYSTAL MATT
Digital printing material

<p>Description</p>	<p>Transparent material specifically formulated for thermoresin, ink jet solvent and eco solvent based inks – printing and cutting systems. Very thin material, suitable for light (colours) fabrics without silicon treatment.</p>
<p>Tips</p>	<p><u>Before printing</u>, remove the additional, external protective film (very easy to detach). Print in reverse, on the layer previously covered with the protective film. We suggest to let the print dry (at least 12 hours) before rolling, overlaying or heat transferring the material.</p>
<p>Application instructions</p>	<p>1) Print in reverse and cut 2) Let print dry at least 12 hours 3) Weed the material. 4) Heat apply with its own polyester backing 5) Remove backing once cold</p> <p>Due to the many different base materials available on the market, the following heat transfer instructions are given as guideline only:</p>
<p>Temperature: Time: Pressure: Washable to:</p>	<p>160-165°C 15 sec. medium/low 50°C Max.</p>

We suggest to always perform some testing before proceeding with standard production
